DETAILED ACTION

The amendment filed May 8, 2006, has been received and entered.

Claims 1-15, 21-23, 26, and 31 are canceled. Claims 38-40 are new.

Claims 16-20, 24, 25, 27-30, and 32-40 are pending and examined on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 16-20, 24, 25, 27-30, 32-38, and 40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Specifically, the recitation "or channel" recited at line 4 of claim 16 and in claim 40, is considered new matter since the disclosure does not expressly specify that the analyte-impermeable, oxygen-permeable membrane does not have any channel. Because the specification as filed fails to provide clear support for the new claim language, a new matter rejection is clearly proper.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-20, 24, 25, 27-30, and 32-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 16 and 39 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: the electrodes (see 5 of Figure 1) and the near-surface part of the diffusion channel for the analyte (see 4 of Figure 1). Thus, claims 16-20, 24, 25, 27-30, and 32-40 are rejected under 35 U.S.C. 112, second paragraph.

Claim 33 is indefinite since it is not clear what feature of the cross-section of the diffusion channel is used in the ratio. Specifically, it is not clear whether a parameter such as the area, circumference, diameter, or radius of the cross-section is used in the ratio that is determined. Therefore, the rejection of claim 33 under 35 U.S.C. 112, second paragraph is maintained.

Claim 35 is rendered indefinite by the phrase "outer concentration gradients." First, it is not clear which substance's concentration is included in the "outer concentration gradients". Additionally, it is unclear what is defined by "outer", which is included in the phrases "outer concentration gradients" and "outer deposits". Is it referring to the region outside the channel entrances? Finally, "diffusion flow" renders claim 35 indefinite because it is not clear which "diffusion flow" is encompassed – that is, is unclear that the diffusion flow corresponds to the diffusion of the analyte. Thus, the rejection of claim 35 under 35 U.S.C. 112, second paragraph is maintained.

Art Unit: 1651

No claims are allowed. Claim 39 would be allowable if rewritten or amended to

overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Susan E. Fernandez whose telephone number is (571) 272-3444.

The examiner can normally be reached on Mon-Fri 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Mike Wityshyn can be reached on (571) 272-0926. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
